Desktop Readers

Patty always says, when someone calls about a seductive-looking portable product ad that they have seen in a magazine or flyer, that if she could only have one device, it would always be her desktop reader. Desktop readers are electronic video magnifiers also known as CCTVs. They are the right arm of the visually impaired person seeking to maintain independence. The newer machines give instant vision of the object or writing, and they are the workhorse for just about all your home needs. Desktop readers definitely have quality and feature differences among brands. Shop wisely and with good information. We can help.

Aumax LCD 19
\$2,395.00
